

> **Asklepios Klinik St. Georg, Hamburg**

KAEFER Construction GmbH, Bremerhaven

Summary	New building and alterations to the CZ emergency and intensive care building for the entire hospital. Work carried out during ongoing operations.
Location	Asklepios Klinik St. Georg, Lohmühlenstraße 5, 20099 Hamburg
Build time	April 2005 to August 2007
Client	Asklepios Kliniken Hamburg GmbH, ZD Bau/Haus P, Lohmühlenstraße 5, 20099 Hamburg
Architect	TSJ Freie Architekten GmbH, Curtiusstraße 19, 23568 Lübeck
KAEFER's role	All dry construction work including delivery and assembly of all door elements, special F30 ceilings in corridors and ceilings in X-ray rooms.
Challenge	To coordinate and execute the technically demanding work. The different demands made of separate door elements had to be reconciled without interrupting operations.
Our solution	Close cooperation with architects, client representatives, suppliers and outside contractors as well as careful coordination of all work stages.
Added value for client	Individual support from nearby branch of KAEFER Construction GmbH and fast, expert solutions competence in additional construction planning.
