

**> LPG storage tank, Tarragona (Spain)**

<b>Project Description</b>	Construction of a LPG storage tank, with a total volume of 40.000 m <sup>3</sup>
<b>Location</b>	Tarragona, Spain
<b>Construction Period</b>	From July 2000 to May 2001
<b>Shipping Company</b>	TGE Gas Engineering GmbH, Bonn (Germany)
<b>Shipyard</b>	BASF Spain
<b>KAEFER services</b>	Supply, installation, engineering and supervision of the entire tank insulation
<b>Challenges</b>	Ensuring high quality despite adverse conditions on site: high humidity, executing the work outdoors et cetera. Furthermore, it was not possible to test the functioning of the tank until the other contractors had finished their work.
<b>Our Solution</b>	A high degree of experience, project-related and customized manufacturing, applying internal standards which had previously been agreed upon with the customer
<b>Benefit for the Customer</b>	Construction, manufacturing, approval and supervision – everything from one source.
<b>Contact</b>	KAEFER Schiffsausbau GmbH, Bremen, Germany
